

Grow Your Business, Maximize Your Success

Extend Your Reach

Maximize patient care in your practice by providing new services with a single flexible device. With Trex HD, your healthcare team will be able to perform a host of neurodiagnostic studies both in the office and in the comfort of your patient's own home.

Trex HD Can Perform:

- Ambulatory EEG Studies – in the patient's home
- Routine EEG Studies – in the office
- Ambulatory EEG/Sleep with High Definition Video
- Home Sleep Testing – Level 2

Simplify ambulatory study review with Trex HD High Definition Video. With Trex HD Video you can see what you've been missing, helping you clarify the patient's state or environment in sync with the EEG study.

Patient Care Satisfaction

Don't send your patients elsewhere for tests that can be performed in-house. Patients value a total care solution. Ensure patient satisfaction by providing diagnostic testing within your practice.

Business Sense

Healthcare trends continue to move towards early detection and prevention. Offering a total care solution could improve your practice.
